

# FRONT-END WEB DEVELOPER

We are looking for a **Front-End Web Developer** for our **KRAKEN LAB** division. Are you a resourceful, motivated developer with a passion for the evolution of technologies?

At **KRAKEN LAB** we like to surround ourselves with people like you! You are probably wondering what KRAKEN LAB is.

It is the Techno-X Group's (GTX) technology innovation centre, which also means that our technologies are at the heart of the SPYPOINT and VOSKER products. You could say that we know our way around cameras and the Internet of Things (IoT).

But it's not just cameras, it's also: millions of images received and analyzed every day, a mix of electronics, artificial intelligence, and state-of-the-art software.

Above all, we are a large family of enthusiasts who are always looking to push their limits. So, we need people who can bring good ideas, who are true partners, and who are ambitious.

## You want to know more about your position?

- Collaborate with UI/UX Experts, Business Analysts, and Scrum Masters to create innovative and engaging products.
- Design reusable and efficient components that will be at the heart of complex web applications.
- Mention technical issues and propose solutions to overcome them.
- Participate in the various development facets: architecture, tests, optimization, evolution, and troubleshooting.
- Share your knowledge and train other team members on design techniques and coding standards.
- Participate in Scrum methodology activities.

## Required skills:

### Minimum qualifications:

- Undergraduate degree in computer science, software engineering, or other relevant degree.
- 3 years of practical experience in software development.
- Good knowledge of Javascript and CSS.

- Knowledge of React or Vue.js application frameworks.
- Knowledge of Agile methods.
- Fluency in both French and English (written/spoken).

### Desired qualifications:

- 5 years of experience in software or systems development.
- Be a reference in Javascript, React, Material-UI, and CSS.
- Have previous experience writing unit tests.
- Have experience with Git.
- Be proficient in Scrum technology.
- Have experience working with Scrum teams.

### Why should you choose the Techno-X Group?

- First, a work environment where performance, innovation, and family are valued!
- A work-life balance.
- Schedule flexibility for early and late risers.
- No traffic, you can work directly from home.
- 24/7 free access to an online doctor.
- A diversified company with a variety of challenges: you can't get bored.
- A group insurance, because we want to take care of our people.

**It is now your turn to tell us about yourself. All you have to do is apply!**
