

PRODUCTION TECHNICIAN

Do you stand out because of your self-sufficiency or your sense of organization and you can adapt fast?

Performance, innovation, and family mean something to you and inspire you?

The **Techno-X Group** and its companies are inspired by the desire to surpass themselves and push the limits. We are revolutionizing the fields of security, technology, customer service, and outdoor activities, thanks to our innovative products and services.

Above all, we are a large family of enthusiast who are always looking to push their limits. To continue our growth, we are looking for a **Production Technician** for our **SPYPOINT** division in Victoriaville.

Main objective

In this position, the technician will assist the engineering team in the standardization and documentation of various operating and quality control procedures.

Main functions

Reporting to the Production Manager, this person will:

- Work closely with production engineers to maintain and optimize SPYPOINT's quality processes and production operations.
- Provide technical assistance to improve floor operations (sorting, repairs, production, quality testing).
- Contribute to the maintenance and efficiency of the production facilities (test bench, serialization park, production system, layout, equipment).
- Develop standard and rigorous testing procedures in the various departments.
- Support daily production activities and participate in the resolution of technical and quality issues (troubleshooting, investigation/data collection, analysis, action plan development and implementation, follow-ups, and feedback).
- Contribute to the organization of an efficient and standardized document management of information related to production and quality.
- Participate in the implementation of a data collection system regarding the causes of returns and the repair statistics in order to optimize quality and production.

The candidate will be successful and have a sense of accomplishment if they have the following skills and interests:

- Self-sufficiency and ability to adapt to unforeseen situations.
- Ability to manage documents and collect data.
- Quality processes are mastered.
- Ability to write structured and complete operating procedures.
- Effective and harmonious communication with all departments.
- Rigorous data accuracy.
- Versatility in the development of new specialties (related to operations) according to the realities and evolving needs of the company.
- Bilingualism: French and English (spoken/written).
- Technical knowledge in electricity/electronics will be considered an important asset.
- Availability to work at our Victoriaville production unit.

Why should you choose the Techno-X Group?

- First, a work environment where family, innovation, and performance are valued!
- A work-life balance.
- Schedule flexibility for early and late risers.
- 24/7 free access to an online doctor.
- A diversified company with a variety of challenges: you can't get bored.
- A group insurance, because we want to take care of our people.

It is now your turn to tell us about yourself. All you have to do is apply!
